VOICES FROM THE FIELD

NAMDEO BHUDHEKAR

CEO, Naadbrahma Agro FPCL,
Nanded, Maharashtra

As an FPO from Nanded - a key Turmeric-producing region - we faced sharp price volatility every season. To protect our farmers, we joined the NCDEX-NABARD Price protection Scheme and hedged 70 MT of Turmeric through put options at strike prices between ₹13,200 to ₹15,600 per quintal at different dates. As prices dropped, we squared off our positions in small lots and earned a profit of ₹3 lakhs. This success boosted our confidence, and we are now actively learning about futures trading as the next step.

PURUSHOTTAM BHARAD

Chairman, Mehkar Jaivik Sheti
Mission FPCL,
Buldhana, Maharashtra

We registered with the Exchange in March 2024 and quickly took the opportunity to hedge turmeric under the Price Protection Scheme. We bought Put Options at ₹15,600 and ₹13,800 per quintal on different dates and in small lots. As market prices declined, we squared off our positions and earned a profit of around ₹4 lakhs. After this, we are now actively trading in futures contracts to deepen our understanding.

KHANDURAJ PATIL

Director, Vishwatej FPCL,
Sangli, Maharashtra

As an FPO, utilizing the futures market has been a game-changer in reducing our pricing risk. With the Exchange, we now understand commodity quality standards and market dynamics, enabling better price negotiations in the physical market. The introduction of **Options in Futures by NCDEX, supported by NABARD**, has further empowered us by minimizing risk and ensuring better prices for our produce in line with market trends.

SURAJ KADAM

CEO, Agrivansh Agro FPCL,
Chhatrapati Sambhajinagar,
Maharashtra

Under the Put Options Price Protection Scheme of NCDEX and NABARD, there was no financial risk involved due to the premium subsidy. So we fully committed to it. We hedged 35 MT of turmeric using Put Options at strike prices ranging from ₹13,000 to ₹15,600 per quintal, based on market trends. Later when physical market prices dropped, we squared off our positions in small lots, delivering around 80 MT in the physical market and securing a profit of ₹5 lakhs.

FPO News

Latest Updates from the FPO Sector and Agri-Sector

Nauni varsity initiates seed production through farmer producer companies

Tribune India

In a major push to natural farming, Dr YS Parmar University of Horticulture and Forestry (UHF), Nauni, has initiated the production of seeds through farmer producer companies (FPCs) in the state. With 80 per cent of the field crop seeds in Himachal being sourced from other states, according to the State Seed Certification Agency's data (2019-20), this project aims to reverse the trend and empower FPCs. Funded by the Alliance of Bioversity International and the International Centre for Tropical Agriculture (CIAT), these farmers will no longer have to procure local seeds, an integral part of this environment friendly and self-reliant farming system.

SRIJAN strengthens 19 women-led Farmer Producer Companies across MP and UP

AgroSpectrum

Self-Reliant Initiatives through Joint Action (SRIJAN) is scaling efforts to strengthen women-led Farmer Producer Companies (FPCs) and expand economic opportunities for women smallholder farmers in rural India.

Following the success of Phase, I of the project, which reached over 24,000 smallholder women farmers, Phase II of the project with new grant support from the Walmart Foundation will benefit a total of 38,000 women farmers across nineteen FPCs. This initiative aims to strengthen women's participation in the agricultural ecosystem, enabling them to embrace leadership roles while enhancing market access and building resilience.

Farmers' Producer Company: An Achievement towards Doubling Farmers' Income through High Tech Horticulture

ICAR

The Nadia Krishi Vigyan Kendra had opened the path of success for the sustainable economic development in a co-operative approach by triggering the technology of high value protective cultivation with marketing support by the Farmer Producer Company. From the Year - 2008 onwards, the Nadia KVK started their activity with the Nakashipara Farmer Producer Company Ltd. Primarily (the then farmer's club), the KVK had uplifted 5 to 6 progressive farmers to focus and encourage the other farmers to adopt their technological and economical achievements. The KVK's movement started in the fields of high value and protected crop cultivation along with other remunerative vegetables like Cole crops, chilli, brinjal, dolichos bean, fruits like banana and flowers like tuberose, marigold and chrysanthemum, etc.

Prayagraj's women-led FPO achieves over ₹85 lakh turnover

Hindustan Times

A farmer producer organisation (FPO) run by rural women and established in the Koraon development block of Prayagraj district has emerged as a model for rural economic transformation, achieving an impressive turnover of over ₹85 lakhs within a single financial year.

This FPO, backed by the National Rural Livelihoods Mission (NRLM), is the first in the district to reach this milestone, significantly enhancing the income of local farmers, especially women from rural areas, according to district officials.

NEW INITIATIVES

NCDEX-IPFT & CoE, IRMA Gujarat host 2nd Batch of Capacity Building Workshop for FPOs

The journey of empowering Farmer Producer Organizations (FPOs) through commodity market education continues with the successful completion of the second batch of the Capacity Building Workshop in Commodity Derivatives held on **30–31 October 2025** at the **IRMA campus, Anand (Gujarat)**. Jointly organized by **NCDEX-IPFT** and the **Centre of Excellence (CoE), IRMA**, the workshop aimed to strengthen the understanding of FPOs on price risk management and enhance their leadership in the organized commodity markets.

The program brought together **30 representatives** from FPOs across Gujarat, Madhya Pradesh, Maharashtra, and Rajasthan, and SMART officials from Maharashtra, engaging them in two intensive days of learning and collaboration. The inaugural session was graced by eminent dignitaries including Mr. R. Ramaseshan (Independent Director, Jana Small Finance Bank), Dr. Prabina Rajib (Director, BIMTECH), Prof. Saswata Narayan Biswas (Director, IRMA), Prof. Rakesh Arrawatia (CoE Chair, IRMA), Prof. Satyendra Pandey (Associate Dean, MDP, IRMA), Mr. Pankaj Bhatt (Vice President, NCDEX), and Mr. Niraj Shukla (Vice President, NICR).

Key learning areas included the journey of commodities from mandi to market screen, the use of futures and options for price protection, hedging strategies for income stability, and the significance of storage, warehouse receipts, and quality standards. Participants also developed essential soft skills in negotiation and conflict management to strengthen FPO governance. A notable highlight was the registration of participants for the **NISM Certification Exam**, taking them a step closer to becoming certified market participants. The workshop concluded with participants demonstrating enhanced confidence and knowledge to engage effectively in commodity markets — a significant stride toward building market-ready FPO leaders capable of safeguarding farmer incomes and driving informed market participation.

WORLD INVESTOR WEEK 2025

6-12 October 2025

NCDEX actively celebrated **World Investor Week (WIW)** from **6–12 October 2025**, with a strong focus on empowering rural communities through financial awareness and investor protection initiatives. The week-long campaign highlighted NCDEX's commitment to promoting financial literacy and strengthening the participation of farmers and FPOs in organized markets.

A key highlight of the celebrations was **Krishi Rath 3.0**, a mobile van campaign designed to take awareness to the grassroots. The campaign covered **5 states, 16 districts, and engaged over 7,000 participants**, spreading practical knowledge on price risk management, hedging, and safe investing.

Another notable initiative, the **Women FPO Program**, empowered **80 women leaders** in agriculture by equipping them with market and financial tools to lead their producer organizations effectively. Additionally, NCDEX conducted **22 Investor Education Programs (IEPs)** across India, reaching **more than 1,500 farmers and FPO representatives**, emphasizing the importance of informed market participation and financial discipline.

These initiatives collectively enhanced the financial capability and confidence of rural participants, enabling them to make informed decisions, protect against market risks, and actively contribute to a more resilient and inclusive agri-economy.

FPO stories and their experiences in managing Risk

Kakreji Farmers Producer Company Limited

Banaskantha, Gujarat

**Uniting Farmers,
Transforming Futures**

Located in the semi-arid expanse of northern Gujarat, Banaskantha is an agriculturally vibrant yet vulnerable region. Farmers here primarily cultivate castor, wheat, mustard, pulses, potatoes, and depend heavily on dairy and livestock for additional income. Castor dominates the landscape due to its adaptability—low water requirement, minimal maintenance, and strong mandi demand.

Despite this potential, farmers have long grappled with challenges: fluctuating mandi prices, high input costs, exploitation by traders, lack of scientific guidance, and limited market access. Selling produce often meant waiting endlessly for traders, with no control over pricing. The absence of collective bargaining made income unpredictable.

Formation of the FPO: A Collective Solution

To break these recurring challenges, a group of progressive farmers envisioned forming a collective that could provide strength, transparency, and knowledge. This led to the establishment of **Kakreji Farmers Producer Company Limited (FPC)** in December 2020.

Their journey began with research, discussions, and a resolve to find expert guidance. As Chairman Nareshji Lheraji Thakor recalls: *"I watched many videos on what an FPO is and how it functions. A friend then guided us*

further, and through him our contact was established with Sambhav Foundation. With their support, we formed the FPO."

Building Trust among Farmers

Once established, the next challenge was convincing farmers to join. Many did not understand how an FPO could benefit them or how collective marketing works. The founding members held repeated meetings in nearby villages to build awareness.

What began with 150 shareholders and minimal capital has now expanded to **750 members**, including over **150–200 women farmers**, marking significant progress in rural inclusion.

One of the biggest reasons farmers began joining the FPC was its ability to offer better and more stable prices. Unlike mandis, where traders decide the value, the FPC ensures fair rates and transparent weighing.

Farmer Shardul Thakor from Vada village adds, *"At the mandi, we often don't get the right price. The FPO gives better rates and also provides knowledge. It is very helpful for farmers."*

New-Age Farming and Value Addition

Kakreji FPC soon expanded beyond conventional agriculture. Understanding the market demand and

region's potential, the FPC embrace diversity and ventured into Moringa farming, Red chilli cultivation, Tomato and leafy vegetable drying, Castor seed aggregation, Passion fruit farming and Cattle feed production.

Banaskantha's strong dairy culture created a natural demand for cattle feed, which the FPC tapped into successfully, adding a steady revenue stream.

Solar Dryer Unit: Innovation at the Grassroots

To reduce post-harvest losses and improve product shelf-life, the FPC installed a solar dryer unit. This clean-energy technology allows them to dry vegetables,

Future Plans: Scaling Value Addition

The FPC has laid out bold expansion plans, including:

- Establishing a dal mill to process tur and chana
- Launching value-added packaged pulses
- Setting up a red chilli processing plant for high-quality exports

A Model for Farmer Empowerment

From solving mandi-level challenges to adopting solar dryers and using digital exchanges, Kakreji Farmer Producer Company Limited has redefined what rural collectives can achieve. By blending traditional

“Our journey with NCDEX changed everything. When we sold 20 MT of castor through an NCDEX-accredited warehouse, all expenses—transportation, lab testing, and warehouse rent—were taken care of. Because the exchange supports the FPO at every step, we are able to pass on more profit to the farmers. Beyond castor delivery, we also used commodity futures to hedge in crops like castor, kapas, guar seed, COCUD, and jeera to manage price risk for our members. On top of that, under the NCDEX–NABARD Put Options Scheme, we executed 145 MT Dhaniya put options, at strike price ₹8300/qt, which helped our farmers safeguard themselves from market fluctuations and ensured they did not suffer losses during volatile seasons”. Naresh ji, Chairman FPO

moringa leaves, and leafy produce in a hygienic and efficient manner.

The FPC has tied up with a buyer for dehydrated products and plans to eventually process and package its own value-added goods, increasing profit margins.

Like any growing enterprise, the FPC faced its share of fluctuations. Their turnover grew from ₹70–80 lakh in 2021–22 to ₹1.5 crore in 2022–23, before dropping to ₹28 lakhs due to operational challenges. However, with renewed planning and diversified activities, the FPC is expected to climb back to ₹1.5 crore in 2025–26.

Strengthening Market Access through NCDEX

A major turning point came when Kakreji FPC began using the commodity exchange platform, **National Commodity & Derivatives Exchange Limited (NCDEX)**, to trade castor and other key crops. Online trading brought complete transparency, competitive pricing, and a reliable system that consistently helped farmers earn more than mandi rates.

strengths with modern tools, they have created a model that ensures sustainable income, skill development, and long-term prosperity.

Kakreji FPC stands today as an inspiring example of how collective strength, good leadership, and market awareness can transform the lives of farmers.
